

Exploiting Parallelism: Object Space

Problem Statement: Take I

```
rval = max(rval, func(a, b, c, d ...));
```

Problem Statement: Take II

```
for a in range(...):  
    for b in range(...):  
        for c in range(...):  
            for d in range(...):  
                rval = max(rval, func(a, b, c, d));
```

Problem Statement: Take III

```
for a in range(...):  
    for b in range(...):  
        for c in range(...):  
            for d in range(...):  
                yield dict(a = a,  
                           b = b,  
                           c = c,  
                           d = d,  
                           );
```
